

LE LAMPS : 7 MODULES TEST

13.12.13 유재희

7 modules

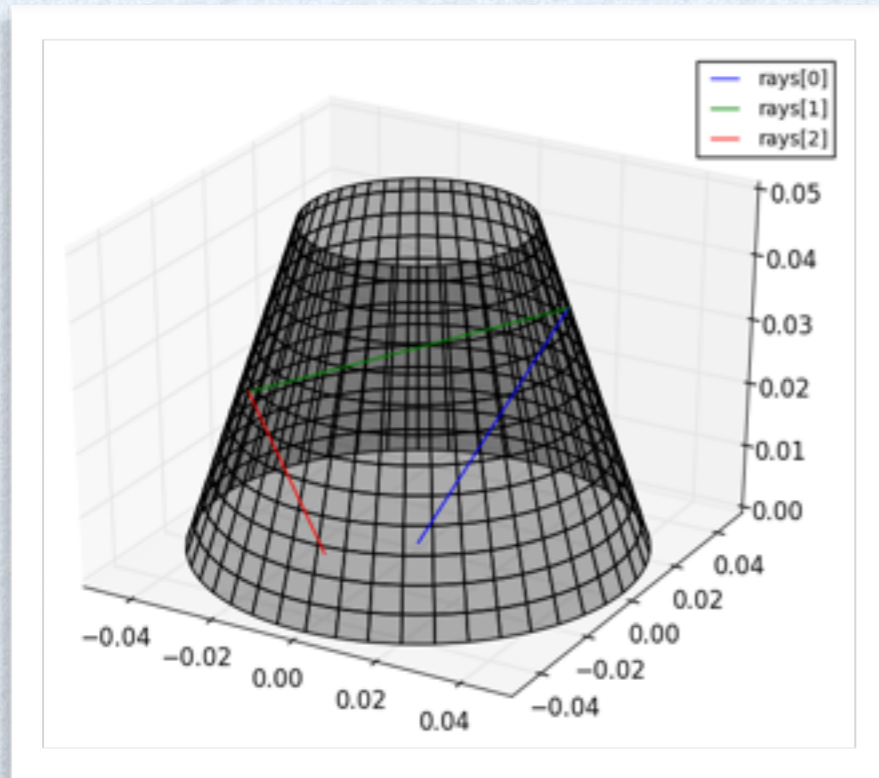

- made 7 modules.

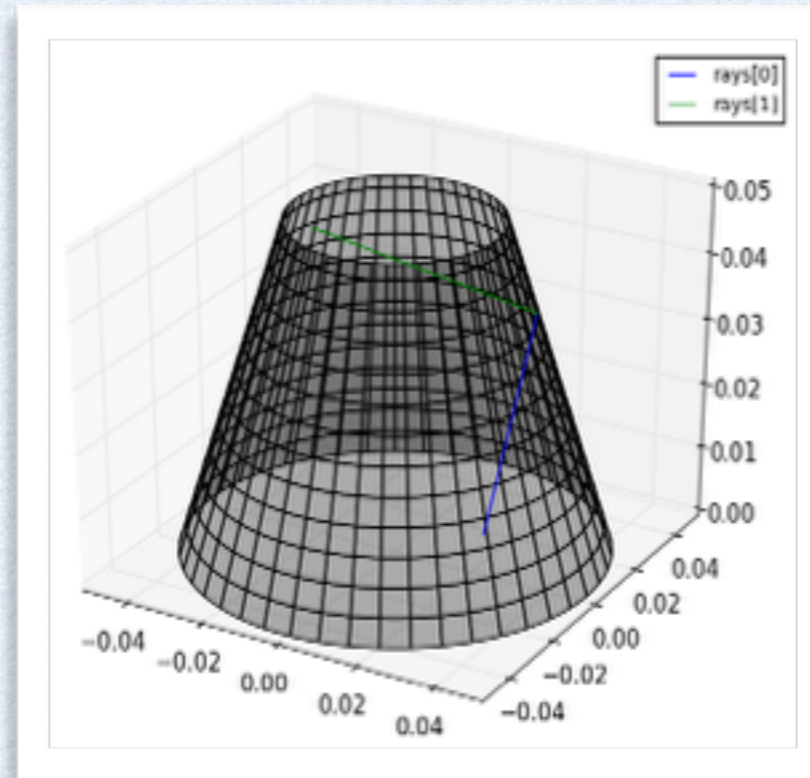

plan

- I will test gains of each detector and adjust each voltage to get the same gain.
- After December 16, I will start californium experiment.

light guide

case of going back

case of passing through the light guide.

design by
Myung soo Seok

- we will find a height which gather a highest efficiency of getting light. size of the case side and the upper side are fixed at 10cm and 5cm (diameter) we just change the height from 3cm to 10cm.
- This is designed by Myung soo and he is calculating the height. He will get the real value of this height until this weekend.
