

# 2013\_8\_30\_labmeeting

KiSoo Lee

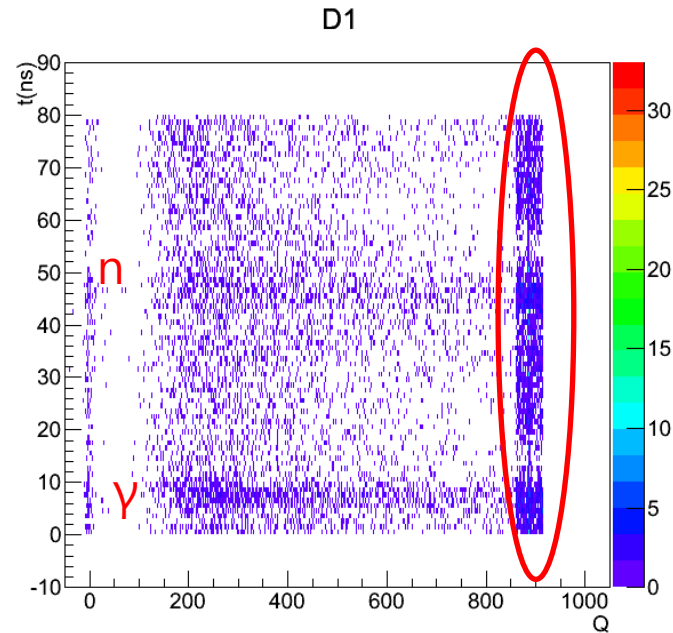

# clusterization

- Find hit order and give cluster number to detectors for each event
- Number of no over flow detector is cluster size
- Sum of no over flow detector ADC is ADC Sum
- Draw only cluster number = 1 case

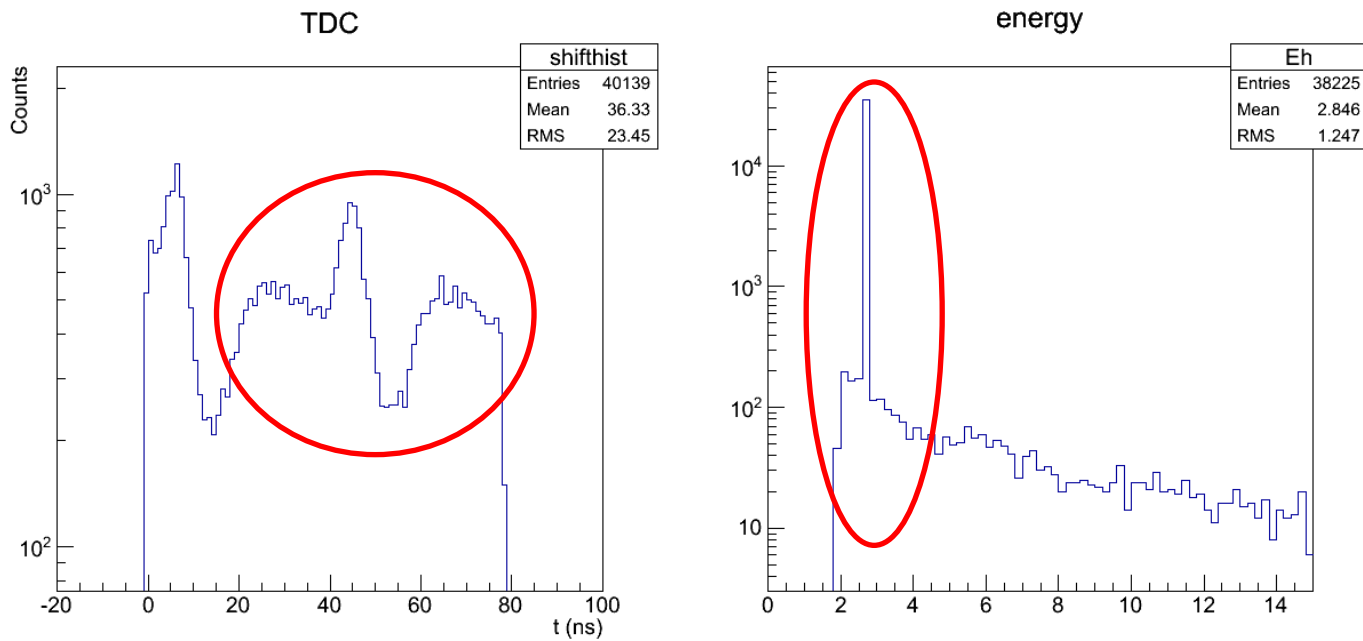

# KIRAMS

- Need to consider over flow

# KIRAMS energy

- Peak of neutron is broken

# Plan

- we do not have 4 detector data(except KIRAMS)
- Do experiment for 4 detector module with Jaehee, Bumgon, Jaebum
- Check accidental consideration in this experiment
