

# PWO(MPPC) bench test at KU

**Jahmin Jo**  
**Korea University**

# Aim of the bench test

- Using PWO crystal and MPPC, study for their properties
- Take advantage of this and go SPring-8 / LEPS in April to MPPC test experiment well.

# Instruments

- MPPC(s13360-6050cs)
- Differentiator board
- LED
- Oscilloscope (Lecroy)
- HV module (keysight)

# MPPC LED test

- HV setting
  - Op Amp voltage : +5V, -5V
  - MPPC voltage : 56V
- Function generator setting
  - f : 100Hz
  - high voltage : 2.7V, 2.8V
  - low voltage : 0V
  - pulse width : 20ns

# MPPC LED test

# MPPC LED test

# MPPC LED test

ohanl  
Hadron & Nuclear Physics lab

# Future goal

- Data taking (using CAMAC or FADC)
- After LED test, I plan to experiment with MPPC and PWO crystal
